Banksman

Deck Crew (Able
Seafarers / Ratings)

Motormen / Oilers

HSE Officers
(Marine / Offshore)

Medic / Offshore
Nurse

Logistics and
Crewing
Coordinators

AGR advantage

AGR's Crew Management capability is built around the realities of running offshore vessels, rigs, and marine assets in demanding environments. We blend marine operations understanding with deep candidate networks, allowing us to assemble compliant, cohesive crews that support safe, efficient operations and stable performance over multiple rotations.

Compliance with maritime standards

We work to STCW, flag state, and class requirements, ensuring crew hold relevant CoCs, STCW modules, and offshore survival certificates.

Rotation and crew-change planning

We manage rotations, handovers, and crew changes around port calls, chopper schedules, and project milestones to minimise downtime.

DP and specialist vessel focus

We supply officers and crew with experience on DP2/DP3 vessels, AHTS, PSVs, CSVs, and heavy-lift or construction vessels.

HSE and safety culture alignment

We prioritise crew with strong HSE track records, incident-free campaigns, and familiarity with offshore safety management systems.
