

MARINE & DECK

Marine assurance, vessel discipline,
offshore continuity

Marine and deck activity depends on personnel who understand the operational demands of offshore vessels, the discipline of deck operations and the coordination required across marine, engineering and lifting functions. From bridge and engine room positions to deck leadership, rigging support and vessel-side control, these roles are integral to safe and efficient offshore operations.

Roles We Provide

Master	Safety Officers
Chief Officers / SDPO	Assistant Deck
2nd Officer / DPO	Foremen
3rd Officer / JDPO	Riggers
Bosun / Deck Foremen	Welders
Crane Operators	Superintendents
Able Seamen	Tower Operators
Chief Engineers	Marine / Subsea
1st Engineer	Construction
2nd Engineer	Welding Engineers
3rd Engineer	Welding Inspectors
Deck Engineers	Platers
Electro Technical Officers (ETO)	Onshore Support
Electricians	Vessel / Fleet Managers
Motormen	HSEQ Personnel
Marine Fitters / Mechanics	

AGR advantage

AGR supports marine and deck requirements with personnel selected for their fit with vessel-based environments, marine operating standards and the practical demands of offshore execution at sea. Our focus is on professionals who can contribute across marine operations, deck activity and vessel support functions where continuity, control and technical competence are essential.

Vessel command and control

Support across senior marine positions responsible for navigation, vessel discipline and operational oversight offshore.

Deck and lifting activity

Coverage across deck supervision, crane operations, rigging and controlled handling activity in live offshore settings.

Marine engineering

Access to personnel aligned to engine room operations, technical support and onboard mechanical and electrical continuity.

Technical vessel support

Personnel suited to fleet, superintendent and HSEQ-linked functions supporting marine performance and operational assurance.

Other Sectors We Serve
